

QuickCubes for Project Management for Microsoft Dynamics NAV

Complete Business Intelligence solution for Project Management – 1-day implementation!

With QuickCubes for Project Management, your project data are automatically turned into useful and timely information, resulting in efficient decision-making throughout your organization. With a QuickCubes solution you will gain a dynamic overall view of your projects, and you'll no longer have to rely on static paper reports. The solution is developed in cooperation with industry-leading Project Management consultants.

The solution covers all relevant information revolving around your pipeline projects, project follow-up, scheduled budgets versus actual budgets, man-hour requirements, project invoicing, and more. You can analyze your projects from various angles such as time periods, projects, and resources, and you can compare budget versions.

Let the QuickCubes solution provide you with valuable project information in a variety of charts, pivot tables and colors - and enable your project managers to easily assess the progress and status of their projects.

Solutions – with or without presentation tool

Solution 1:

For detailed information please refer to the QuickCubes for Dynamics NAV product sheet.

QuickCubes for Project management provides business and IT users alike easy access to beneficial business insights.

Solution 1:

This is the right solution if you are already an experienced user of Business Intelligence and familiar with a presentation program – or if you wish to use Microsoft Office 2007 as presentation program.

- Complete Business Intelligence solution containing data warehouse including measures and dimensions – designed for Project Management and Microsoft Dynamics NAV.
- Easy editing without coding with timeXtender Solution Edition.
- Results can be viewed in your own Microsoft Office or SQL based presentation program.
- Microsoft based.

Total price:

13.500,00 €*

Solution 2:

This is the right solution if you are new to Business Intelligence.

- Complete Business Intelligence solution containing data warehouse including measures and dimensions – designed for Microsoft Dynamics NAV.
- Easy editing without coding with timeXtender Solution Edition.
- Results are viewed in Analyzer: a 100% web based presentation program, including 1 Analyzer Report Designer and access for an unlimited number of web based users.
- Microsoft based.

Total price:

20.000,00 €*

- You can combine your QuickCubes for Microsoft Dynamics NAV with your preferred presentation tool (front-end), such as Microsoft Office Excel, Microsoft Office SharePoint Server, TARGIT, Toolpack Solutions, Analyzer or other SQL based presentation programs.

*) Includes timeXtender, the most advanced tool available for building and maintaining your data warehouse and cubes without coding. Prices are based on a Solution Edition license of timeXtender. The Solution Edition license connects only to 1 data source and can only be purchased in combination with QuickCubes. For a solution with multiple data sources a timeXtender Basis Edition license or Corporate Edition license should be purchased.

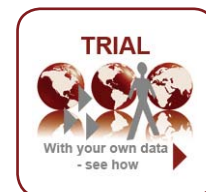

A maintenance fee of 20% of the promotion price will be added. This will give access to all new versions of the software and updates to the solution if available. All prices are exclusive of VAT.

Prerequisites:

- Dynamics NAV version 4.0 and later
- Project Management
- ODBC License for Dynamics NAV
- Works with both SQL Server and Navision Native
- Microsoft SQL Server 2005/2008
- IIS for Analyzer client program
